

 OLSHCO Our Lady of the Sacred Heart College of Guimba, Inc.	Course Code/s	CAP101
	Description	Capstone Project and Research 1
College / Department: BS INFORMATION TECHNOLOGY	Assignment No.	2
ASSIGNMENT		Page 1 of 1

ISO STANDARD:

TEAM/GROUP: OLSHCO HR MANAGEMENT SYSTEM

As of our last update in January 2022, there isn't a specific ISO/IEC standard tailored specifically for making user applications quicker on human resources websites. However, we might want to consider standards related to usability, user experience, and performance optimization, such as:

ISO 9241 - Ergonomics of human-system interaction series, which includes guidelines for user interface design and usability.

ISO 25010 - Systems and software engineering series, specifically the section on usability, which provides criteria and guidelines for evaluating software product quality.

ISO 9126 - Software engineering series, particularly the section on functionality, which includes guidelines for performance efficiency.

While these standards may not directly address speed optimization, they cover aspects of usability and performance that can indirectly contribute to making user applications quicker. Additionally, we may want to explore industry best practices and guidelines for web performance optimization to complement these standards.

MEMBERS AND THEIR CONTRIBUTION:

MEMBER'S NAME	CONTRIBUTION
Carl John Yasay	Contributed to answering this assignment number 2, answered assignment number 5, and entered the answers of Mr. Vista and Mr. Rivera in the template.
John Vincent Prado	Contributed to answering and checking if the answer is wrong for this assignment number 2, answered assignment number 4 together with Mr. Lucas.
Mharco Angelo Vista	Answered assignment number 2 together with Mr. Rivera.
Jhon Henrick Lucas	Contributed to answering and checking if the answer is wrong for this assignment number 2, answered assignment number 4 together with Mr. Prado.
John Wendell Rivera	Answered assignment number 2 together with Mr. Vista.
